

Subject: Can Heartburn Cause Cancer? (Jeff's Shocking Story)

Hi,

Several months ago, I had a very interesting conversation with a 53-Year-old guy named **Jeff Martin**.

It appears that Jeff had once been **diagnosed** with **esophageal cancer**.

Jeff claimed that the medical community was **not addressing** the **acid reflux condition** properly and had used particularly strong words against **Big Pharma** whom he felt had been deliberately not providing the **solutions**.

According to Jeff, who is now **completely free of cancer and acid reflux**, the '**enemy**' resides within.

Indeed, Jeff attributed acid reflux to **ONE hidden cause** (other than diet or stress).

The **acid reflux breakthrough** was made by a biologist and fellow acid reflux victim, **Bob Andrews**...who shared **his discovery** with Jeff.

If you suffer from acid reflux or heartburn in any level of severity, I truly recommend that you **watch the video** Jeff had shared with me:
